EDUCATION

Bachelors In Software Engineering

City University of Science and
Information Technology

2023 - current

SKILLS

- Python,
- C++
- PHP
- JavaScript,
- HTML
- CSS
- React (Beginner)
- Bootstrap
- Tailwind CSS
- Flask
- FastAPI
- MySQL
- RESTful APIs

HOBBIES & INTERESTS

- AI & Emerging Technologies
- Continuous Learning
- System Design
- Software Architecture

LANGUAGE

- English
- Urdu

PROFILE

Software Engineering student with hands-on experience in full-stack web development, Android application development, and AI-powered systems. Skilled in designing scalable applications, integrating LLM APIs, and building production-ready solutions using modern development practices. Passionate about problem-solving, system design, and developing intelligent software that solves real-world challenges.

EXPERIENCE

Full Stack Intern DevSpire Solutions Nov 2025 – Jan 2026

- Developed a full-stack quiz platform with frontend, backend, and database integration.
- Built secure quiz workflows and AI-powered subjective evaluation features.
- Designed responsive user interfaces and advanced quiz management modules.
- Implemented custom organization branding and system enhancements.

Quizior.live | Personal Project Feb 2026 – may 2026

- Developed a full-stack quiz platform with frontend, backend, and database integration.
- Built secure quiz workflows and AI-powered subjective evaluation features.
- Designed responsive user interfaces and advanced quiz management modules.
- Implemented custom organization branding and system enhancements.

UI/UX Feedback System | Personal Project Feb 2026 – may 2026

- Built an AI-powered UI/UX analysis platform using Google Gemini 2.5 Flash and a multi-agent architecture.
- Developed Flask REST APIs, MySQL integration, and secure session management.
- Implemented image-based design analysis with screenshot and drag-and-drop support.
- Designed a responsive, high-performance frontend using Vanilla JavaScript and custom CSS.

CERTIFICATIONS
